

Muhua (黄牧华) Huang

muhua@stanford.edu · muhua-h.github.io · [LinkedIn](#) · [Google Scholar](#)

Computational social scientist and Stanford Organizational Behavior PhD researcher studying how AI systems represent human traits and reshape collective behavior. I build large-scale LLM-agent experiments and psychometric methods to investigate human-AI collaboration, culture, values, and emergent social dynamics.

EDUCATION

Stanford Graduate School of Business, PhD in Organizational Behavior	2025 – 2030
University of Chicago, MA in Computational Social Science, GPA: 3.9/4.0	2023 – 2025
University of British Columbia, BA in Computer Science & Psychology (Honours), GPA: 4.2/4.3	2018 – 2023

Additional training: International AI Evaluation Programme Fellow; SICSS-Beijing (Outstanding Project, scholarship); Google Research Mentorship Program Scholar.

RESEARCH EXPERIENCE

PhD Student Researcher Stanford Graduate School of Business	2025 – Present
- Built a large-scale multi-agent coordination experiment with approximately 375,000 GPT-4o trials across networks of 2–50 agents, replicating a human category-formation paradigm. - Identified systematic human-AI differences in category boundaries and showed that constraining agents to human labels reduced performance by 12.7%.	
Master's Researcher University of Chicago	2023 – 2025
- Developed a psychometrically validated framework for assigning Big Five personalities to LLM agents across GPT-3.5, GPT-4, and Claude 3. - Collected data from 350 participants and showed that assigned personalities predict agents' moral reasoning, risk-taking, and cooperation; published in <i>Personality Science</i>.	
Research Assistant University of British Columbia	2020 – 2023
- Used SEM and simulation to evaluate alternative personality scale formats and CFA fit indices; contributed to publications in <i>Journal of Personality Assessment</i> and <i>Psychological Methods</i>. - Applied ML/NLP to 10,000+ youth essays, supervised 20 research assistants, and studied personalized AI explanations using eye-tracking; contributed to <i>Journal of Social Issues</i> and an IJCAI XAI workshop paper.	

INDUSTRY EXPERIENCE

Student Researcher Google DeepMind	Jun – Sep 2026
Contributing Researcher and Writer Stanford HAI & Google DeepMind	2026
Co-developed <i>Organizing Intelligence</i> , a research primer on 16 frontier ideas in AI and organizations.	
Research Intern Microsoft Research Asia	Jul – Oct 2024

LEADERSHIP & SERVICE

Computational Social Science Workshop Coordinator University of Chicago	2024 – 2025
Organized the weekly MACSS workshop featuring speakers on advanced computational methods and interdisciplinary research.	
Teaching Assistant University of British Columbia	2021 – 2022
Taught Human Computer Interaction Methods and Systematic Program Design; rated 4.7/5 and received three return offers.	
Crisis Respondent Kids Help Phone; 230+ hours and 550+ people supported	2019 – 2020
Peer Reviewer <i>Personality Science</i> ; <i>Behaviour & Information Technology</i>	

Methods: LLM agents/GABM, psychometrics/SEM, social network analysis, ML/NLP, behavioral experiments, RAG, Python, R, SQL.

Recognition: Stanford GSB & EDGE Fellowships; UChicago Thesis Award; MSRA Outstanding Intern; OpenAI Researcher Access.
